Mould tables

fibo mould tables are of sturdy steel construction covered with a descaled steel plate with fine tolerances.

The tables can be supplied with hydraulic tilting function, built in heating pipes and vibrators.

The tables are available in more standard sizes or according to require-

Production of concrete wall panels on in-line hydraulic tilting tables.

Mould table with form work.

The hydraulic tilting system with flow divider for synchronous lifting of the table.
For stability reasons the cylinders switch to low speed before reaching top position.
Each cylinder is equipped with a safety valve in case of hose breakage.

Tilted 32 m long table equipped with built-in heating pipes and frequency controlled vibration.

fibo intercon offers a wide range of machines and equipment for the concrete industry

- *Concrete conveyors*
- *Hydraulic tilting tables*
- *Circulation tables*
- *Concrete spreaders*
- *Cranes*
- *Vibration units*
- *Moulds*
- *Forms*
- *Cubing systems*
- *Curing racks*

Furthermore we supply complete production plants, silo systems, batching and mixing plants included.
